PROFESSIONAL SUMMARY

Researcher and Data Scientist with over 3 years of experience delivering data-driven insights, managing client relationships, and leading end-to-end research projects across diverse sectors, including FMCG, financial services, telecommunications, media, health, education, manufacturing, and international development. Experienced in managing more than 20 quantitative and mixed-method research projects, serving as the primary client contact from project design through analysis, reporting, and presentation of findings.

CORE SKILLS

- Client relationship management
 - Advanced Data Analysis (Python, SPSS, SAS, STATA, R, SQL, NVIVO), Geospatial Analysis & Mapping
 - Advanced data visualization & Dashboard (Power BI, Ms. Excel, Tableau, Metabase)
 - Advanced Experience with Microsoft Office (Word, Excel, PowerPoint)
 - Qualitative & Quantitative Research
 - Strategic Insight Generation
 - Research Project Planning & Management
 - Business Development & Client Relations
 - Program Monitoring & Evaluation
 - Stakeholder Engagement & Communication
 - Statistical & Analytical Methods
 - Field Data Collection & Team Training
 - Report Writing & Presentation
 - Customer Relationship Management (CRM)
 - Programs & Database Management
 - Project Design
 - Presentation and Public Speaking
-

Some of the projects I have handled are:

- **TechnoServe, MSMEs (Shops) Management and Performance Tracker Mobile App (2025): Rollout and Adoption of The Mspark App for Retailers in Kenya.** A market study aimed to ensure the successful deployment, adoption, and sustained use of the mSPARK app by 2,500 micro-retailers in the Nairobi Metropolitan. This was a monitoring and evaluation study with three phases i.e., MSMEs onboarding and baseline survey, midline survey and endline survey. I was the project manager, data analyst (SPSS, STATA) and in charge of report writing.
- **AutoXpress Ltd, Employee Engagement & Satisfaction Survey (2025):** This was a multi-country survey conducted across Kenya, Tanzania, Uganda, and Zambia, with the primary aim of evaluating the key drivers of employee satisfaction and engagement, as well as identifying areas for improvement. I served as the Project Manager, overseeing both qualitative and quantitative data collection, conducting data analysis using SPSS, Stata, Python, and NVivo, and leading report writing and dissemination of the study findings.
- **Helen Keller International (HKI), Post Event Coverage Survey (2024):** The study aimed to assess maternal and child health services coverage, determinants, and data-driven decision-

making in Narok North Sub-County. I was in charge of both qualitative and quantitative field and data collection management, data analyst (using SPSS, Stata, Python and NVIVO), conducted geospatial analysis, mapping and report writing.

- **KCB, Corporate Reputation Index (2024):** This was a biennial market tracking survey aimed at assessing the bank's reputation among both customers and non-customers by evaluating brand awareness, usage, trust, and advocacy. I served as the Project Manager and Data Analyst (SPSS), overseeing client engagement, report writing, and the dissemination of key findings and recommendations.
- **KCB, KCB Learning Institutions Value Chain (2024):** The aim of the survey was to understand the changing dynamics and identify opportunities for the Bank. I was the project management assistant, participated in the projects desk research, management, report writing and workshop.
- **National Media Group, Education Management System Evaluating Market Demand for Technology in Education Management (2024):** The study aimed to assess the market appetite for using technology to deliver an education management program, including testing a new school management system. The objective was to determine the feasibility and desirability of integrating digital solutions to improve administrative efficiency and communication in schools. Key stakeholders, including parents, students, and teachers, were invited to interact with the app. They provided valuable feedback on its functionality, usability, and overall impact on their education experience. I was the project manager, data analyst (SPSS) and in charge of report writing.

PROFESSIONAL EXPERIENCE
